

GRP CYLINDRICAL TANKS

DOMESTIC & SEWAGE WATER TANKS

PIPECO INDUSTRIES

ABOUT US

Pipeco Group is one of the leading manufacturers, suppliers, and exporters of GRP Cylindrical Tanks. It's usage of domestic, sewage water storage. We have successfully delivered services for over two decades and will promise to continue with the same services for our potential clients.

Our Products are Designed and Manufactured Under BS 4994 STD.

We guarantee our products, and we never compromise with quality standards and it beats the best in the market at present. Our products have made their grasp also with the overseas market and getting excellent feedback. We are so well connected with our quality of the products that we receive positive feedback from our valuable customers. And many of our vendors are also immensely satisfied with our products and services. We ask for your continuing interest and support. If you have any requirements reach via sales@pipecogroup.com

Under Ground

GRP CYLINDRICAL WATER TANK

Pipeco Group offer optimum quality Water Tank using GRP that are corrosion resistant, leak proof and easy maintenance. These GRP Water tanks are made by HAND LAY UP process. It is available in horizontal and vertical type cylindrical or rectangular in shape. Our extensive experience help us to meet the industrial and commercial demands with our quality range of GRP storage tanks. These are ideal for storage of potable water/Treated Water/ Sweet Water.

We offer tanks of Capacities available from 1000 U.S. GALLON to 20,000 U.S. GALLON.

Built to Thrive in the heat Climate:

While your existing content provides a great foundation, let's add a section that specifically addresses the benefits of GRP water tanks in the context of the unique climate and environment. Here's what you can include:

- **Superior Heat Resistance:** Unlike metal tanks that can absorb and transmit heat, GRP offers excellent thermal insulation. This keeps your stored water cooler for longer, even under the scorching heat sun.
- **Lightweight Advantage:** The lightweight nature of GRP tanks makes them easier to transport and install, especially on rooftops or in remote locations. This is a significant benefit considering the potentially challenging working conditions in hot weather.
- **Durable and Seismic Resistant (Optional):** GRP construction offers exceptional strength and resilience. Additionally, GRP tanks exhibit inherent seismic resistance, making them a suitable choice for areas prone to earthquakes (check local regulations for specific requirements).
- **Minimal Maintenance Needs:** The smooth, non-porous surface of GRP minimizes algae growth and reduces the need for frequent cleaning. This translates to lower maintenance costs, particularly in regions with high dust levels and potential sandstorms.

Applications in the UAE:

- **Residential Water Storage:** Ensure a reliable supply of cool, potable water for your home with a GRP tank. Its durability and leak-proof design guarantee long-lasting performance.
- **Rainwater Harvesting:** Capture and store valuable rainwater for irrigation purposes. GRP tanks are ideal for this application due to their non-contaminating nature and minimal maintenance requirements.
- **Industrial Water Storage:** GRP tanks are a versatile solution for various industrial applications. They can be used for storing process water, treated wastewater, or other non-potable liquids.

Why Choose Pipeco Group for Your GRP Water Tanks?

- **Unmatched Quality:** We use premium GRP materials and proven manufacturing processes to deliver exceptional tanks built to withstand the Heat climate.
- **Extensive Experience:** Our team has years of experience designing and supplying GRP solutions for diverse water storage needs in the heat climate.
- **Customizable Options (Optional):** We cater to your specific requirements with a range of sizes, configurations, and capacities (1000 to 30,000 U.S. GALLONS).
- **Expert Support:** Our knowledgeable staff is available to answer your questions and guide you in selecting the perfect water tank for your climate application.

GENERAL SPECIFICATION

Brand Name	Plastic/Fiberglass Glass Reinforced	
Material Shape of The Tank Applied	Reinforced Fiber Plastics Vertical BS 4994 1500 USG, 2500 USG, 3000 USG, 5000 USG, 7000 USG Internal Smooth	
Standard Capacity	Finish External Mat Finish Inside & Out Side White Colour	
Surface Finish	No Partitions For The Water Tank Provided Inlet, Outlet &	
Color of The Tank	Airvent Manhole with The Size of 55 cm Dia (Should Be	
Partitions	Provided) High Quality Gp Resin, Csm Mat Woven Roving &	
Tank Connections	with	
Access Manhole	Uv Resistant Gelcoat.	Uv Resistant Gelcoat.
Raw Materials	1500 USG - 4 mm - 5 mm	6000 USG - 8 mm - 9 mm
